

Mi Personalidad

Student reflections:

Anaya Kirtane (Year 9):

"I thoroughly enjoyed the play. The storyline was very funny and the actors worked very well with us and were able to keep us intrigued and involved. As the main character changed from different styles, all of us were very excited and were laughing along with the play. They also gestured very largely, they knew what we had learnt in Spanish and knew our comfort level with the language so by gesturing we were able to understand the plot even better."

Nicole Kilby (Year 9):

"I really enjoyed the Spanish play because it was funny and different. Both of the actors were very good, speaking very slowly and clearly so we could understand. I was surprised with how much of the language I understood. I really enjoyed hearing Spanish people speaking Spanish. The actions the actors used while they spoke also helped with my understanding."

Milly Amin (Year 9):

"I really enjoyed the play because it was fun and interactive. I understood most of the language and I always knew what was going on. The story line was very funny and I'm glad it had a happy ending. The actors made sure the audience understood what was going on."

Lara Spajic (Year 9):

“I really enjoyed the play, because we were familiar with the language that they used and I enjoyed it very well. I liked how the actors interacted with the audience and we had to repeat some things and that helped us understand the play. It had a great ending and I think it was a great play.”

Zaynab Choudhury (Year 9):

“I enjoyed the play very much. I understood almost every word and the actors were very active and made the scene clear using their actions. Watching Fernando muddle through various personas was extremely humorous, however it was clear that the best persona was the natural one he had at the start. This play gave a huge insight into how people feel about their identity, and how it is sometimes best to just accept yourself the way you are.”
